

The **Lite Cylinder** takes your mind off of your gear and keeps it on your sport.

*When you hit the trails in your outdoor adventures, propane is an essential piece of gear for cooking and heating. Whether you're hiking, biking, hunting or camping, there's nothing worse than lugging around a steel tank, only to discover the hard way that the tank isn't full.*

*There is now an alternative with Lite Cylinder. It reduces the weight of your supplies and with easy-to-see propane levels, outdoor enthusiasts will never run out of propane mid-trek again.*

### See the difference –

- The Lite Cylinder is translucent. Your fuel level is always visible. No more running out of propane mid-trip.
- The Lite Cylinder is 50% lighter and much easier to carry than cumbersome steel tanks.
- The Lite Cylinder is brightly colored and highly visible, making it easier spot and not left in camp.
- The Lite Cylinder will not corrode or rust and has smooth edges. Your equipment will never be stained or damaged.

### 10# CYLINDER

<b>COLOR</b>	<b>Green</b>
<b>W.C.</b>	<b>24.5# (11.0 liters)</b>
