

Whether you're grilling on the patio or tailgating for the big game, the **Lite Cylinder** will quickly become your favorite grilling accessory.

The Lite Cylinder is translucent, so you'll always know when you need to refill your propane before the barbecue. Refilling at most propane dealers is easy with standard valves and DOT approval. Lighter than traditional metal cylinders and equipped with comfortable handles, the Lite Cylinder is easy to transport to the campground, tailgate or cookout.

- *Translucent Cylinder: easy to see propane levels*
- *Lightweight: 30%-50% lighter than steel*
- *Corrosion Free: will not rust*
- *Available in 10lb, 20lb and 25lb cylinders*
- *Stackable*
- *Equipped with standard UL Listed Type #1 valve and OPD*

See the difference –

- The Lite Cylinder is translucent. Your fuel level is always visible. No more running out of propane right before the big party.
- The Lite Cylinder is 30%-50% lighter and much easier to carry than cumbersome steel tanks.
- The Lite Cylinder is made of composite material, meaning it will never leave rust stains on your grill or patio, and you'll never waste money throwing out a rusted cylinder.
