

This is one family's story about discovering the Lite Cylinder.

The Nelson family spends months at a time sailing the world, and they couldn't do it without the Lite Cylinder.

"It's so helpful to be able to see exactly how much propane is left. I wouldn't dream of using anything else." -Gene Nelson

When they are overseas, not only can their Lite Cylinder be refilled by most propane dealers, and they also enjoy its many other benefits:

- Allows for extended trips out at sea; up to 6 months with two 20 lb cylinders
- Lite Cylinder is certified for refilling in most countries
- With translucent cylinders, the Nelsons can be sure a propane dealer has filled the tank
- Constructed of plastic and fiberglass composite, cylinders won't rust in the damp ocean air
- Handles make carrying cylinders inland for fill-ups easier

See the difference –

- The Lite Cylinder is translucent. Your fuel level is always visible. No more running out of propane mid-trip.
- The Lite Cylinder is 50% lighter and much easier to carry than cumbersome steel tanks.
- The Lite Cylinder is brightly colored and highly visible, making it easier spot and not left in camp.
- The Lite Cylinder will not corrode or rust and has smooth edges. Your equipment will never be stained or damaged.
- Available in 10# and 20# sizes

10# CYLINDER

COLOR	Green
W.C.	24.5# (11.0 liters)
T.W.	9.6# (4.4kg)
DIA	9.6" (243.8mm)
OL LENGTH	17.25" (438.2mm)
DOT	Approved
Canada	Approved

New for the marine industry:

- 20 lb horizontal cylinder
- Equipped with fast fill/OPD/Liquid Level Gauge valve
- Designed with vapor withdrawal to be used horizontally
