

FOR IMMEDIATE RELEASE

**THE ALTERNATIVE TO STEEL PROPANE TANKS
AVAILABLE TO THE MASSES**
Lite Revolution Launches New Web Site

Nashville, Tenn. – April 24 , 2009 – Just in time for the summer 2009, The Lite Cylinder Company, has launched its new web site, www.litecylinder.com and is making their revolutionary propane cylinders available to the world. Whether you are ready to start up the grill, leave the land behind and sail, or hit the open road and go camping, Lite Cylinder propane tanks can help you get to where you are going.

Lite Cylinder offers composite propane cylinders for grilling, cooking, heating and boating applications. Composite cylinders have numerous benefits that set them apart from metal propane tanks as they are lightweight and feature an easy to carry handle, are see-through so you will never be surprised by running out of gas. They also feature a flat bottom case to keep the cylinder from moving around, and they are also rust and corrosion free, which is great for those using Lite Cylinder on sailboats in salt water regions. Lite Cylinder can also be re-filled the same way that you refill your metal tanks.

“No matter which application you are using your Lite Cylinder in, our design offers the ultimate in convenience, safety and accessibility,” said Darrel Reifschneider, CEO, The Lite Cylinder Company. “We created our composite tanks to answer a need for the consumer. Research showed that many consumers were buying multiple tanks to make sure they had a back up for propane, as they

could not see how much was left in the tank. We wanted to offer consumers the ability to have one tank that would fulfill their needs, and

Lite Cylinders are available for \$80-90 online and at select retail locations. Visit www.litecylinder.com to purchase your cylinder today, or to find a location near you. Customers can also call (866) 412-LITE (5483) for more information or to place an order.

Founded in 2002, The Lite Cylinder Company is located at 139 Southeast Parkway Ct., Franklin, TN 37064. Lite Cylinder manufactures tens of thousands of cylinders worldwide that include a 10lb, 20lb and 25lb option. The company is approved by the Department of Transportation, Transport Canada, as well as two European standards. For more information, visit www.litecylinder.com or call (866) 412-LITE (5483).
