revolutionary propane cylinders

Fur-Fish Game

March 2011

Lite Cylinder composite-structure propane fuel tanks are lightweight and see-through. You can tell at a glance how much fuel remains in a tank, which means you will never again haul a heavy steel tank to camp only to later discover it half empty. The tanks are 30-percent lighter than steel tanks of comparable volume, and they never rust. Available in 10-, 20- and 25-pound sizes. The 9-inch-diameter 17-inch-high 10-pound cylinder weighs 20 pounds when full. The 20-pound cylinder is 18 inches tall, 13 inches wide, and weighs 32 pounds full; the 25-pound cylinder is 24 inches tall, 13 inches wide, and weighs 45 pounds full. All feature a flat-bottom case to keep the cylinder from rolling and an easy-carry handle. Approved by the U.S. Department of Transportation and Transport Canada. Contact: The Lite Cylinder Company, Dept. FFG, 139 Southeast Parkway Ct., Franklin, TN 37064; (866) 412-5483; www.litecylinder.com
